

Circulation

Audited Circulation

International Railway Journal is the world's only journal dedicated to the international railway industry whose complete circulation is audited by Verified. Not only is our total circulation audited, but more significantly, so is the reader's job function. Fewer than 3000 publications worldwide have qualified for this stringent approval.

Worldwide Distribution

International Railway Journal is distributed to every country known to operate a railway or rapid transit system. In today's rapidly changing marketplace, only a worldwide circulation will guarantee that you can get your message across to all your potential customers.

Circulation Guarantee

Any company advertising in a publication has the right to demand that any circulation claim be independently verified. IRJ is the only international railway magazine that offers its circulation for approval by what is arguably the world's most stringent auditing body, Verified.

Verified audits the total circulation which includes all mailed copies, their geographical distribution and, most importantly, the business and occupational details of each recipient.

Our Verified certification is your guarantee.

For detailed information about our circulation to your target markets, contact your IRJ sales representative.
